

Extended Data Fig. 3 | Human13 web interface and example state-tracing workflow

Case: tirzepatide injection (Mounjaro) — saved run a6b1629ace8346f4, illustrative interface example (not a benchmark panel)

a

Human13

A research workspace for tracing how physiological events propagate from molecules and cells to whole-body responses.

Event

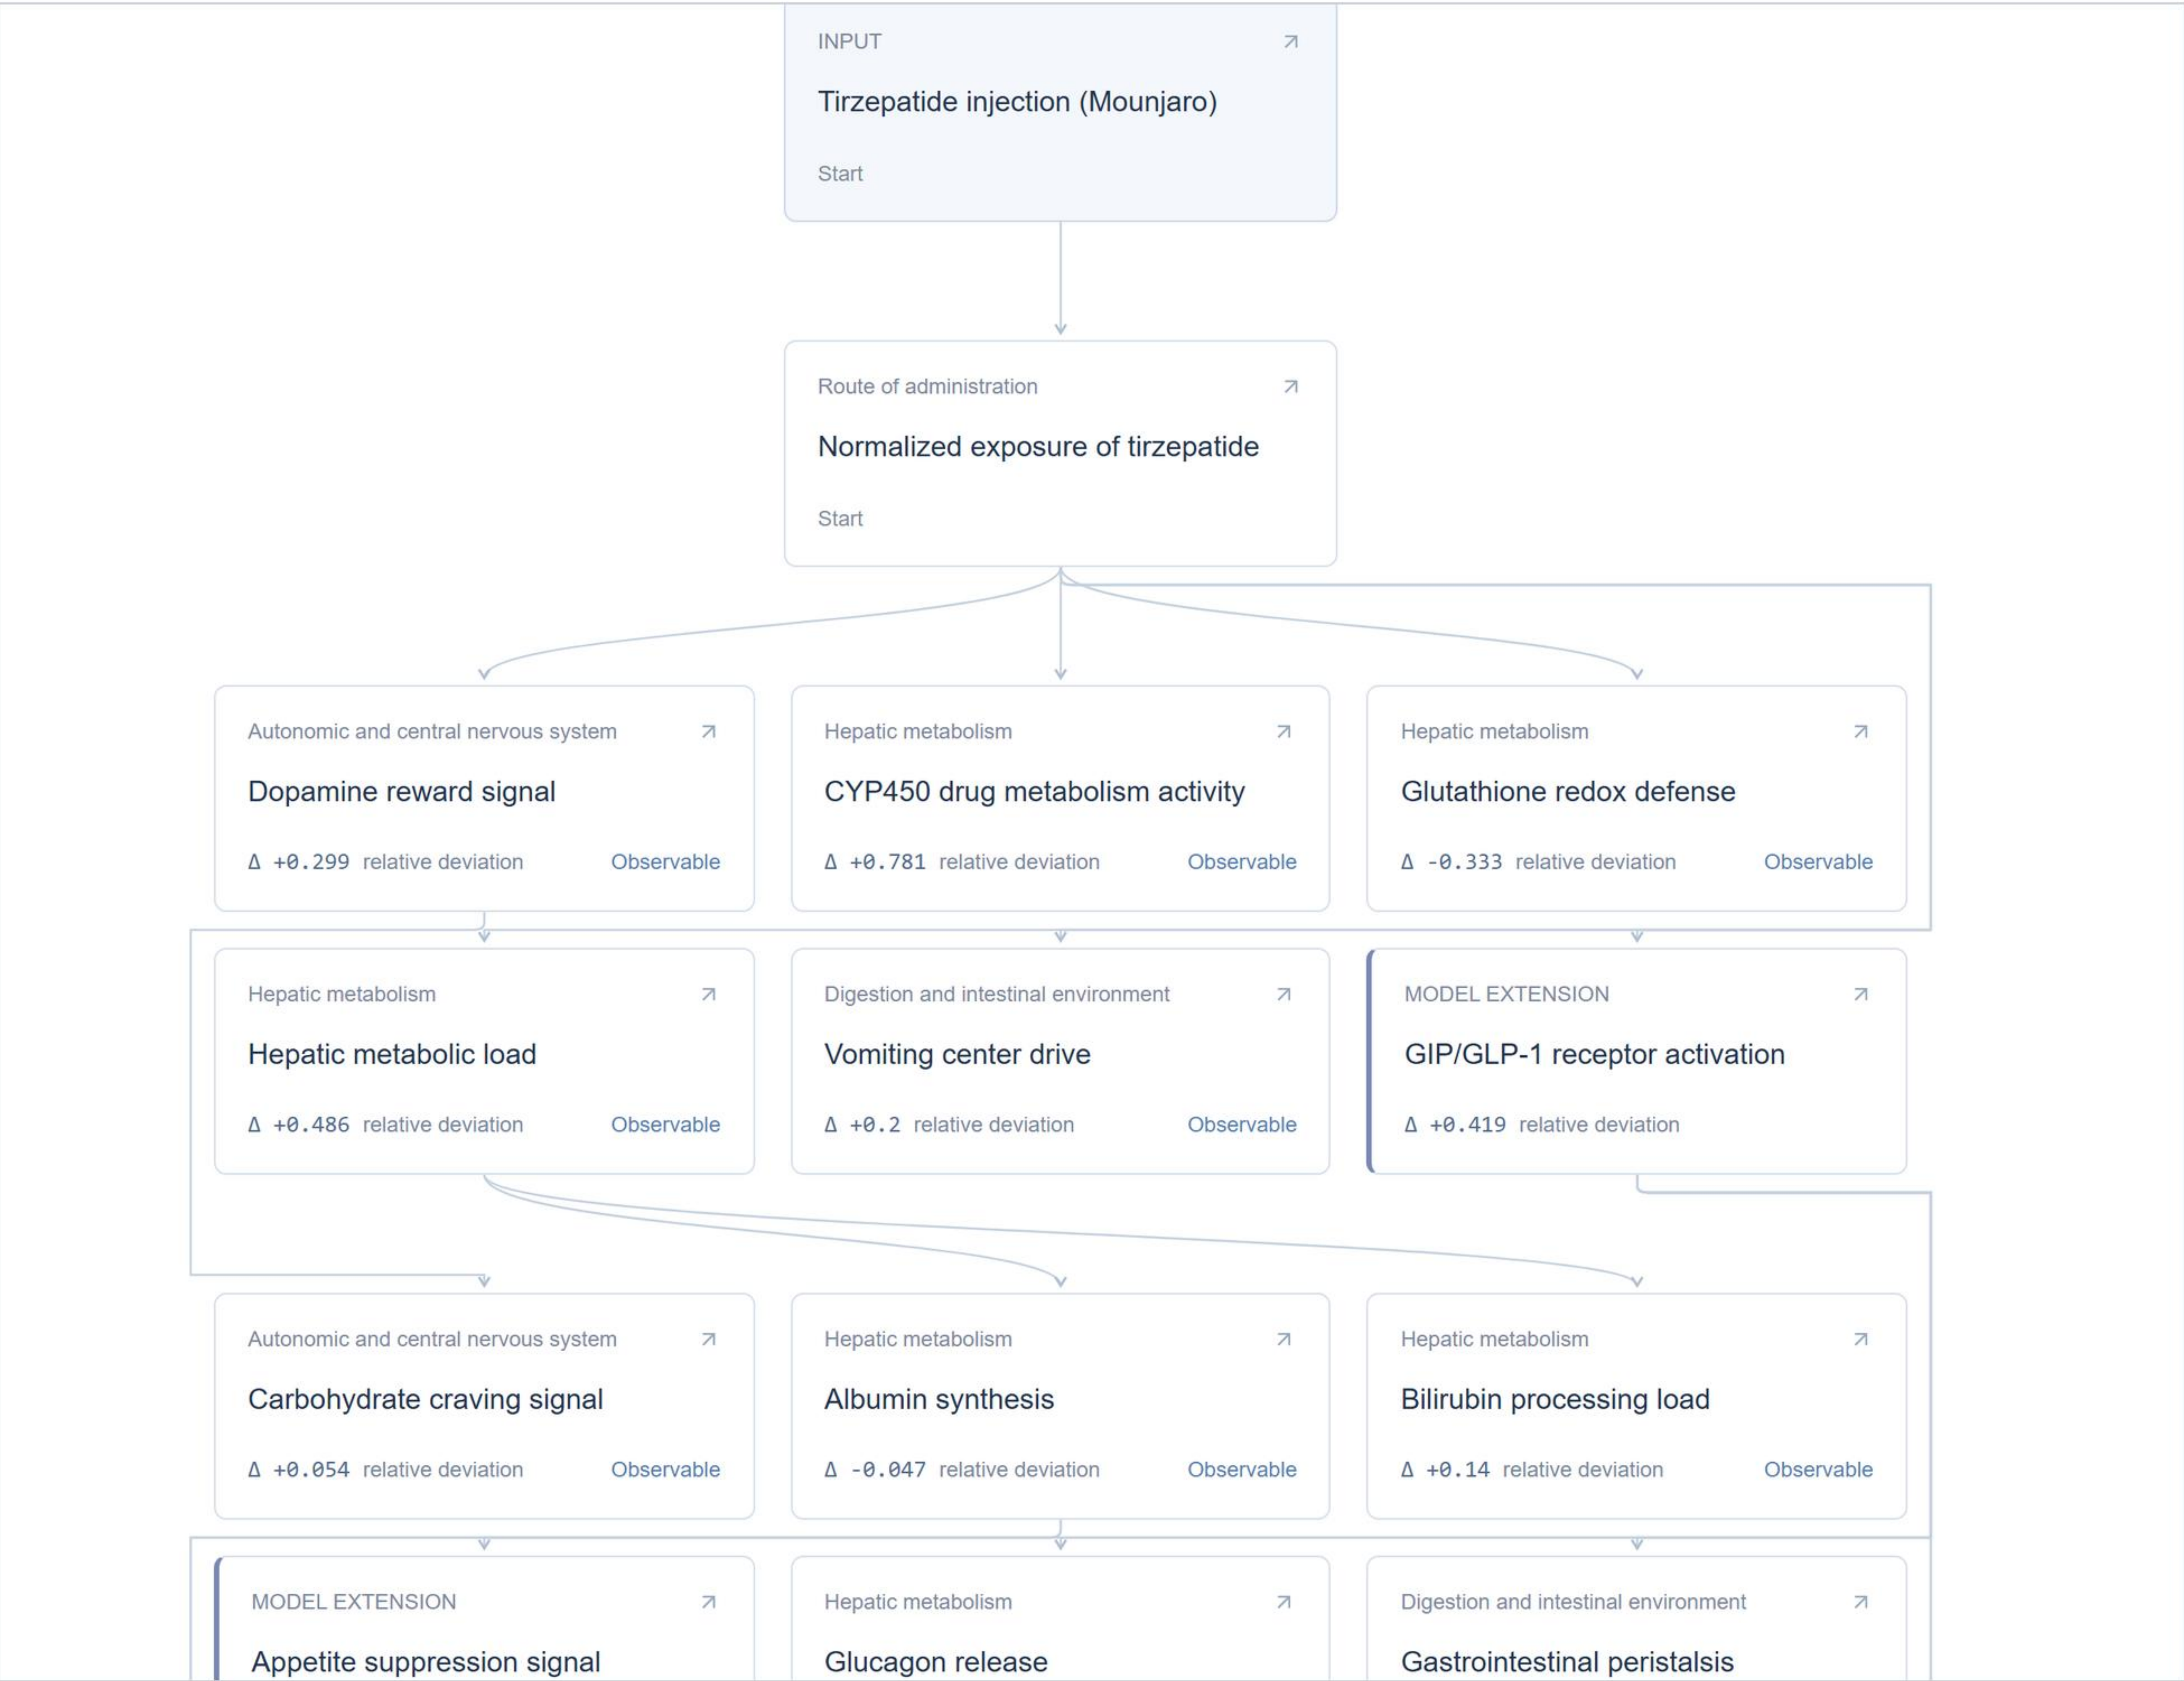

EVENT INPUT

I received a tirzepatide injection (Mounjaro).

Trace response ↘

Added 3 model states. Updated 98 existing observables.
